

Curtis-Straus certification process Based on Lit-SOP-0034 & Lit-Sop-0035

**BUREAU
VERITAS**

Note 1 With Application customer shall provide application form; signed certification agreement; test report; equipment manual; component specification; other supporting documents;

Note 2 Additional information may be required from applicant or agent at this stage and CB would contact the applicant or agent;

Note 3 Sometimes a technical evaluation will highlight issues that would not be uncovered until this stage. CB will contact the applicant or agent for clarification or additional information;

Note 4 If there are discrepancies, either administrative or technical, CB will contact the applicant or agent for clarification or additional information;

Note 5 Discrepancies during Surveillance can lead to certification termination; withdrawal; suspension or reduction of certification;

Note 6 Refusal to provide certification might occur during any stage of certification process due to arising conflict of interests; technical failures; lack of documents to support certification.

More details or procedures on any of the certification processes described in the flowchart can be provided upon the request.
